Manual Data Configuration

Please wait a couple of minutes after setting it up.

Android (MY Touch, G1, MOTO Cliq & Behold 2)

(1) Press **Menu** button.

(2) Tap **Settings > Wireless Controls or Wireless Networks > Mobile Networks.**
→Check if "**Data Roaming"** and "**Use Only 2G Networks"** are both UNCHECKED.

(3) Tap **Access Point Names**.

(4) Press **Menu** button and select **New APN**.

(5) Enter the following information:
- → Name: **H2O Wireless**
- → APN: **att.mvno**
- → Proxy: **66.209.11.33**
- → Port: **80**
- → Username: **<Blank>**
- → Password: **<Blank>**
- → Server: **<Blank>**
- → MMSC: **http://mmsc.cingular.com**
- → MMS Proxy: **<Blank>**
- → MMS Port: **<Blank>**
- → MCC: **<Blank>**
- → MNC: **<Blank>**
- → APN Type: **<Blank>**

(6) Press **Menu** and then Save.

(7) *For Samsung Behold II press **#*87927#**

(1) Download **Blackberry Desktop Manager** for either PC or MAC.
   → Double click on the **".exe" file** and install **Blackberry Desktop Manager**.
(2) Then, download Mini Opera.
   → Choose your **phone model**.
   → Download **Opera Mini** and save the **"ZIP" file** onto your **Desktop**.
   → Locate the **"ZIP" file** on your Desktop.
   → Right-click on the **file** and click **"Extract All"**.
(3) Go to the **Blackberry Desktop Manager.**
   → Go to **applications** and import **files**.
   → Find **Opera Mini** and click on **Plus (+)** symbol to the Far Right and install.
   → The application summary should be at the very bottom of the screen.
   → Please make sure the Opera Mini reads and says install **next** to the application.
   → Apply all settings and sync. (*If you receive an error message when you apply. Click on the screen again to refresh it and the Opera Mini should appear in the installation list.)
(4) Once installed, go to **Blackberry Downloads** file and install **Opera Mini**.
(5) Please make sure you check that Wi-Fi is turned **off** and all your **At&t** service books are deleted.
   → Options > Advanced Options > Service book
(6) Go to **Options > Advanced Options > TCP/IP**. Be sure there is a **check mark** for APN Setting Enable and for the APN type **att.mvno**.
   → Make sure that **APN Authentication** is NOT checked.
   → Then, click on **Blackberry Menu Button** and save.
